

Mobile Learning Environment – MLE of VIWE

This solution was adopted in order to allow access to the VIWE platform from mobile terminals. This block detects the operating system and browser version of the user, and redirects the page according to such characteristics as device type or screen size. This solution also provides Java applications which can be installed on mobile terminals in order to provide further functionalities and greater access to the platform.

Mobile Interface

MLE Browser test

The screenshot displays a mobile interface for MLE-Moodle. At the top, there is a navigation bar with 'Start', 'Inbox(0)', and a power icon. Below this, the text 'MLE-Moodle' is displayed. A welcome message 'Welcome admin!' is followed by four main navigation buttons: 'My Courses', 'Messages', 'Community', and 'Extras: Mobile Tags'. At the bottom, it says 'Powered by MLE-Moodle'.

Emulate different devices (use different Style-Sheets):

- Standard
- Big screen
- Device with touchscreen
- iPhone or iPod Touch

How to use....

There are the following options to access VIWEMoodle with your mobile phone:

- With a special application for mobile phones (click on Download):

[Download](#)

- Open this address in the web-browser of your mobile phone:
